Re: Request for Reconsideration of Determination on Case Nos. ZA-1989-17683-PA2, ENV-2020-1328-CE, ZA-1989-17683-PA2-1A

Honorable Commissioners:

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling and production, we write in follow-up to the appeal hearing regarding the West Pico Drill Site. The intent of this letter is to:

- Identify significant misstatements of information that were presented to the Commission at the August 18, 2021 West LA Area Planning Commission (APC) hearing on NASE's appeal; and
- Request that at the September 1, 2021 APC meeting, you vote to reconsider the NASE appeal because the significant misinformation was material to the central and largest issues in NASE's appeal and was relied upon by the Commission in your deliberations.

This letter identifies the three most consequential pieces of misinformation that were provided to the Commission by the Zoning Administrator (ZA) during the appeal hearing, most of which was presented after the close of the public testimony. To demonstrate the errors, we will contrast the misrepresentations that were made with clear documentation contained within the case file for the West Pico Drill Site. In summary, the three issues we will focus on are:

The ZA stated that "no new wells" had been drilled on the West Pico Drill Site since the ZA approval of 2000 (ZA-1989-17683-PAD) and the Settlement Agreement of 2001. NASE presents in this letter clear

documentation contained in the case file that new wells were drilled in 2005-06 and 2010.

- The ZA stated that the Settlement Agreement between NASE and the City prevents the alteration of any conditions of approval, including Condition 72, and that NASE was requesting the City rewrite the Settlement Agreement. This statement is based on a lack of review of the Settlement Agreement. The Settlement Agreement does not enshrine or mention Condition 72 and does not enshrine under court approval all of the conditions set in the 2000 cases. Instead, the Settlement Agreement references only Conditions 77 and 78, which expressly empower the ZA to revise all conditions and impose additional conditions when addressing "neighborhood impacts" and "the efficacy of mitigation measures" and extends the ability to revise conditions to the 5-year reviews required by the Settlement Agreement.
- The ZA informed the Commission that well conversions are mere reclassifications on paper and "vested rights" that require only the filing of paperwork. These statements are wholly untrue. Well conversions are construction projects that entail substantial changes to wells below the surface and above the surface. Well conversions have required full review and approval by the ZA as discretionary actions since at least 1955, by the terms of LAMC 13.01.H and 13.01.I.

1. New Wells Were Drilled In 2005-06 and 2010.

One of the largest, clearest, and most consequential untrue statements made by the ZA was his repeated assertion that "no new wells" had been drilled since the 2000 ZA approval in ZA-1989-17683-PAD and the Settlement Agreement. The ZA said this in response to questions from Commissioner Laing about the dates on which new wells were drilled. On the official recording of the hearing, you will find this exchange starting at the 1:58:45 mark. This statement is categorically incorrect, contrary to documentation in the ZA case file, contrary to documentation in the appeal case file, and contrary to knowledge of Planning staff.

First, and simplest of all, on June 19, 2020, the applicant and site operator, PCEC, straightforwardly informed the ZA, the Chief ZA, and the City Attorney that two new wells had been drilled since 2000 without the ZA approval required by LAMC 13.01.H and 13.01.I. PCEC identified the wells as West Pico 58 drilled in 2005-06 and West Pico 59 drilled in 2010.

Below are key excerpts from PCEC's June 19, 2020 email. Multiple copies of this email from PCEC are in the ZA case file and NASE also submitted copies of this email to the Commission in support of its appeal.

Edber, per our conversation here is our thoughts on the items we discussed.

With regard to the first issue, after reviewing our well files, and the 2000 ZA determination, it is clear that certain wells have been drilled, re-drilled and converted since that approval—see "Well List" below. In light of LAMC 13.01H and 13.01I, a question has surfaced regarding whether these well activities required further authorization or approval by the ZA. We have not seen any approvals by the ZA and our conclusion is that applications were likely never submitted to the City. We believe this was because of Condition 72 of the 2000 ZAD 17683 determination which states in part "Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations." This condition suggests that the 2000 ZA approval covered a total of 69 wells and, provided the facility did not exceed the 69 wells, no further ZA approvals for drilling and redrilling were required. However, it appears the facility may not have had 69 existing wells at the time of the determination. This may have been a misunderstanding during the determination between well "slots" vs actual wells. In any event, a question now exists regarding whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA review and approval pursuant to LAMC 13.01H and 13.01I.

Thank you

Well List

New Drills

WP 58 - 2005

WP 59 - 2010

In addition to the documentation from the site operator, Professor Michael Salman also submitted copies of the State regulatory agency DOGGR's (now CalGEM's) documents proving that these two new wells had been drilled, one in 2005-06 and the other in 2010, sending the materials to the ZA, the Chief ZA, and the Director of Planning. Below are snapshots of key excerpts from the DOGGR permit applications for new wells, DOGGR permits for new wells, and the DOGGR work history forms submitted by the site operator.

These documents (and more in the ZA case file) prove beyond a shadow of a doubt that two new wells were drilled in 2005-06 and 2010. Thus, the APC's decision on

West LA APC August 27, 2021 Page 4

August 18, 2021 was based on inaccurate information provided by the ZA and should be re-evaluated in light of the facts.

DOGGR Application, Permit, and Well Summary for drilling of new well in 2010.

Brad Pierce, Agent BREITBURN ENERGY CO. L.P. 518 South Flower St., Suite 4800 Los Angeles, CA 90071

Cypress, California July 08, 2010

your proposal to drill well "West Pice" 59, A.P.I. No. 037-27133, a tion 30, T. IS, R. 14W, S.B. B. & M., Beverly Hills Field, a faces. Repetto and Hauser pools, Los Angeles County det = 0.14/2010, received 7/7/2010 has been examined in conjunction with records fried in one owner.

THE PROPOSAL IS APPROVED PROVIDED:

- Blowout prevention equipment with hydraulic controls, equivalent to this Division's Class IIIB3M requirements, or better, shall be installed and maintained during drilling operations.
- Drilling fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used.
- 3. Sufficient material to control lost circulation of drilling fluid shall be available for immediate use at the well site.
- 4. A directional survey shall be made and filed with this Division within 15 days of completion of drilling.
- 5. A Supplementary Notice shall be filed with this Division prior to completion of the well.
- This Division shall be consulted and a Supplementary Notice may be required before making any changes in the proposed program.
- 7. THIS DIVISION SHALL BE NOTIFIED TO:
 - a. Witness a test of the installed blowout equipment prior to drilling out cement in the abox of the 10 3/4" casing.
 - b. Witness a test of the installed blowout equipment prior to drilling out cement in the shoe of the 7" casing.

THE PROPOSAL IS APPROVED PROVIDED:

- Blowout prevention equipment with hydraulic controls, equivalent to this Division's Class IIIB3M requirements, or better, shall be installed and maintained in operating condition.
- Drilling fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used while redrilling.
- 3. All oil, gas or freshwater sands behind the 7" casing shall be protected by either lifting cement or by multiple stage cementing.
- 4. A directional survey shall be made and filed with this Division.
- This Division shall be consulted and a Supplementary Notice may be required before making any changes in the proposed program.

REPORT ON PROPOSED CHANGE OF WELL DESIGNATION

ypress, California December 21, 2005

Chris Williamson BREITBURN ENERGY CO. LP 515 South Flower St., Suite 4800 Los Angeles, CA 90071

Your request, dated 12/7/2005, proposing to change the designation of well(s) in Sec. 30, T. 1S, 14W, SB B. & M., Beverly Hills Field, Los Angeles County, District 1, has been received.

The proposed change in designation, in accordance with Section 3203, Public Resources Code, is authorized as follows:

"West Pico" 46 API No. 037-26615 shall be known hereafter as "West Pico" 58.

Hal Bopp

2. The Settlement Agreement Does Not Prevent Revisions of Conditions, and it in Fact Requires Revisions When Warranted.

At the August 18 APC hearing, the ZA repeatedly stated the process before the Commission was a Review of Compliance with the conditions of the Settlement Agreement, and that everyone should "close the book on it" (2:11:37), not change his determination so that he could "clean it up" and move on to a new process, one that could allow for the revision of conditions of approval. This is a fundamental misrepresentation of the Settlement Agreement between NASE and the City and the process required by the Settlement Agreement.

Of overarching significance is the fact that the Settlement Agreement does not lock in place all 2000 conditions of approval and instead requires 5-year reviews of those conditions to ensure they are still adequate to protect the surrounding community and ensure compliance by the site operator. If the conditions fail to do so, the 5-year review is intended to be the process wherein new or revised conditions are imposed upon the West Pico Drill Site. The inaccuracy of the ZA's claims regarding the Settlement Agreement can be best demonstrated by a review of the Agreement itself, along with the condition it references.

Section 4.b of the Settlement Agreement, inserted below, refers expressly to Condition 78 of the 2000 ZA approval:

At the Review of Conditions required by Condition No. 78 b. imposed by the BZA and adopted by the City Council, to occur two years after construction and the issuance of a Temporary or Permanent Certificate of Occupancy, the Zoning Administrator will consider the findings and conclusions of the Risk Assessment Expert and impose any additional conditions deemed appropriate or within the Zoning Administrator's continuing jurisdiction under Condition No. 77 or otherwise. If the report of the Risk Assessment Expert indicates that the operations at the BreitBurn facility pose a risk of cancer of greater than one in a hundred thousand (1 x 10-5), BreitBurn will request a public hearing and a public hearing will be deemed warranted pursuant to Condition No. 78. provision does not otherwise limit the Zoning Administrator's discretion to set the matter for public hearing.) Within ninety (90) days prior to the fifth anniversary of the first review held pursuant to Condition No. 78, and on each five-year anniversary thereafter, BreitBurn will request an additional review of conditions pursuant to the procedures prescribed in Condition No. 78 and the Zoning Administrator will conduct a review of conditions as prescribed in Condition No. 78 and will issue a report of its review and schedule a further public hearing, if warranted. Such report shall be promptly forwarded to NASE, BreitBurn and the applicable Neighborhood Council.

Condition 78, inserted below, prescribes what is supposed to happen in the 5-year reviews required by the Settlement Agreement:

78. Review Of Conditions. Two years following completion of construction, and the issuance of a Temporary or Permanent Certificate of Occupancy, the applicant shall submit a Plan Approval application (\$523 fee) for the purpose of reviewing the effectiveness of these conditions. The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The applicant shall address each condition with appropriate supporting material, to the Zoning Administrator who shall contact all monitoring agencies, evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures. The Zoning Administrator may impose corrective conditions if warranted. The Zoning Administrator may set the matter for public hearing if warranted.

Thus, pursuant to the Settlement Agreement and Condition 78, the ZA was required in the current review case to evaluate "neighborhood impacts," evaluate "the efficacy of mitigation measures," and the ZA was empowered to assign "corrective conditions." Unfortunately, the ZA failed to follow these requirements and has instead advocated for kicking the can down the road to an uncertain future process. Not only is this an inefficient use of City resources, it delays relief for the community. Moreover, while the 5-year review is legally required, the ZA does not have the authority require a new process at this time.

The ZA made additional misrepresentations regarding the Settlement Agreement that are also material to the Commission's determination. At the APC hearing, the ZA repeatedly said that Condition 72 was imposed by and enshrined in the Settlement Agreement, along with all other conditions, and therefore he did not have the authority to change it because the agreement was approved by a Court. (Statements made starting at 20:15 and 2:07:35 marks.) As set forth above, the Settlement Agreement specifically contemplates revisions to conditions, thus demonstrating this statement is incorrect. Moreover, as can be seen in a review of the attached Settlement Agreement, the only conditions of approval referenced within the Agreement are Conditions 77 and 78, both

West LA APC August 27, 2021 Page 11

of which provide the ZA the ability to revise the remaining conditions. (Attachment 1.) Condition 72 is not included in the Settlement Agreement, nor was it agreed upon in the Settlement Agreement as claimed by the ZA.

NASE presented in written and oral testimony that Condition 72 does not allow the site operator to drill new wells or convert existing wells without ZA approval or CEQA review, and to the extent it is interpreted as allowing redrilling of wells without ZA approval or CEQA review, the condition must be considered void because it violates the long-standing requirements of Los Angeles Municipal Code section 13.01.H and I. The misrepresentations made by the ZA prevented the Commission from addressing the illegality of Condition 72, as well as the illegal drilling, redrilling and conversion of wells. Thus, reconsideration of this appeal based on the facts at hand is necessary.

Finally, the ZA misled the Commission when stating on slide 9 of the powerpoint presented at the APC that there had been no violation of the Settlement Agreement. There can be no questioning the fact that 5-year reviews were not held in 2010-11 and 2015-16, and that both the City and the operator breached the terms of the Settlement Agreement. This is supported by findings buried within the ZA's June 2, 2021 determination:

The Office of Zoning Administration review of the whole of the record found that the operator was in violation of Condition 36, Condition 39, Condition 49 and Condition 72 of the conditions of approval imposed by the Board of Zoning Appeal in its action taken on BZA No. 2000-1697 (the appeal of Case No. ZA-1989-17683-PAD). Also, the Zoning Administrator found the operator was in violation of clause 4b of the 2001 Settlement Agreement.

2001 Settlement Agreement Condition

Clause 4.b: On June 8, 2001, the City of Los Angeles, the operator and concerned parties entered into an agreement where all parties mutually agreed to thirteen clauses in order to settle the litigation filed challenging the EIR certified in connection with the drill site modernization approval, *Neighbors for A Safe Environmental v. City of Los Angeles*, LASC Case No. BC240760. Pursuant to clause 4.b of the 2001 agreement, the operator is required to file a Plan Approval for compliance review on each five-year anniversary of the latest review. The latest review was completed March 13, 2006, in which case, the operator was required to file a Pan Approval in 2011 and failed to do so. The operator did not file the 2020 Plan Approval application until after the failure was pointed out by this Office.

It is the intention of the parties that the Project be allowed to f. proceed immediately in accordance with the prior conditions of approval as amended only by the terms of this Agreement. In the absence of the complete implementation of the resolution of dispute provisions of this Agreement, including the right of BreitBurn to proceed immediately to complete and operate the project without any further administrative or legal proceedings, it is the intent of BreitBurn and the City to file an appeal from the judgment entered by the Superior Court on May 9, 2001. A Notice of Entry of Judgment was served by Petitioners in this case on May 17, 2001. Pursuant to California Rules of Court section 2(a) provides that a notice of appeal must be filed no later than July 16, 2001. If the City does not take the actions set forth in subsection 6(b) or the Court has not accepted the actions of the City as in compliance with the writ or set aside the writ as provided in subsections 6(b) or (c), on or before July 16, 2001, then, unless otherwise agreed to by all parties, any party thereto may file a notice of appeal on such date and this Agreement shall terminate and be void.

Thus, due to the misinformation the ZA presented to the Commission regarding the Settlement Agreement and the process required by the Settlement Agreement, the APC should reconsider its determination regarding NASE's appeal. Contrary to claims made by the ZA, the documentation presented herein and elsewhere in the record clearly demonstrates that the Settlement Agreement and the 2000 ZA approval both specifically empower the ZA to change conditions of use whenever necessary or warranted. Thus, the issue is not just that the ZA erroneously believed no changes were needed. The overarching issue is that the ZA short-circuited the review process and the CEQA process by claiming that conditions could not be revised.

3. Well Conversions Are Not Mere Paper Reclassifications and There is No Vested Right to Convert Wells.

There is no dispute that 10 well conversions have occurred on the West Pico Drill Site since 2000. PCEC provided documentation of these well conversions in their June 19, 2020 email. NASE also documented these well conversions with documents obtained by Professor Salman from DOGGR/CalGEM. At issue is that fact that the ZA misinformed the Commission regarding the nature of well conversions. At the APC hearing, the ZA stated that well conversions are mere paper reclassifications of wells, and nothing more, which is both a factual and legal misrepresentation. The ZA determination and written response to NASE's appeal also falsely claimed that well conversions were covered by Condition 72.

West LA APC August 27, 2021 Page 13

As an initial matter, NASE believes some background information on the nature of well conversions would be helpful. Well conversion refers to converting a producer well into an injection well, or vice versa. Most of the wells at the West Pico Drill Site are producer wells (Class A in the terms used in LAMC 13.01) that extract crude oil, natural gas, and brine water from well bottoms more than 8,000 feet deep. They extract a fluid and natural gas slurry by means of pumps that are located inside the wells. The pumps pull the slurry up out of the wells and push it into pipes that join together to connect to a pipeline that carries the slurry from the 9101 West Pico half of the drill site to the 9151 West Pico half of the drill site, the slurry is separated into its three major components of crude oil, natural gas, and "produced water" (aka brine water). The oil and natural gas are processed before being pumped into pipelines to take them out for sale. The produced water is sent to giant pumps located on the 9151 West Pico half of the drill site, which pump the produced water into a second pipeline crossing back to the 9101 West Pico half, where the water goes into injection wells.

The remainder of the wells at the West Pico Drill Site are injection wells (Class B in LAMC 13.01) that return produced water to the hydrocarbon bearing geological strata. Injection wells serve three major purposes: They are required by law to safely place the heavily contaminated brine water back down in the geological strata from whence it came. Returning the produced water helps to prevent subsidence of soil, which had been a major problem in some oil operations before the invention of injection wells in the 1940s. Last, the injected produced water both repressurizes the oil field and can sweep remaining oil toward the bottoms of producer wells, so the use of injection wells is part of oil production. All of this injection part of oil production is regulated by layers of City law, State law, and Federal law.

Converting wells entails substantial work both underground in the well ("downhole") and on the surface. A well conversion is a substantial physical project that can have significant impacts during the construction phase and later during ongoing operation.

To convert a producer well to an injector, at minimum the process involves:

- disconnecting the producer well from the surface pipes that collect the fluid and gas slurry from producer wells and send it by pipeline to the 9151 West Pico half of the drill site.
- opening up the well and removing the extraction pump
- remove production tubing and well packing at designated intervals that separate hydrocarbons from the fresh water table
- repairs and reworking of well components is common, and can be substantial
- generally, the production tubing is replaced with injection tubing called an "injection string" and new well packing is installed at designated intervals

• the well is then connected to new piping that connects to the pipeline bringing produced water back to the 9101 West Pico half of the drill site from the giant injection pumps located at the 9151 West Pico half of the drill site.

To convert an injection well to a producer is the same process in reverse, including installing a new downhole extraction pump and production tubing, etc.

With that background on the extensive physical activity and potential for impacts involved when converting wells, it becomes clear that these are not mere paper reclassifications as claimed by the ZA. The attached DOGGR permitting and work history documentation for 2 of the 10 well conversions that have taken place at the West Pico Drill Site since 2000 demonstrate the well conversion work is time consuming, taking one month for one well and 7 months for the other. (Attachment 2.)

In addition to being factually incorrect that well conversions are mere paper reclassification, the ZA was also incorrect as to the legal requirements applicable to well conversions. The City has established clear legal requirements for ZA discretionary review and consideration prior to the approval of well conversions, and also the need for environmental review of well conversions.

Below is Los Angeles Municipal Code section 13.01.I and the relevant section of LAMC 13.01.H addressing review procedure, both of which have been in effect in the City since 1955. For more than 65 years City Code has defined well conversions as a specific kind of project that requires application to and approval from the ZA as per LAMC 13.01.H. The ZA's claims that such review was not required was misleading and inaccurate.

- H. Drilling Site Requirements. Any person desiring to drill, deepen or maintain an oil well in an oil drilling district that has been established by ordinance, or to drill or deepen and subsequently maintain an oil well in the M3 Zone within 500 feet of a more restrictive zone shall file an application in the Department of City Planning on a form provided by the Department, requesting a determination of the conditions under which the operations may be conducted.
- Permits. No person shall drill, deepen or maintain an oil well or convert an oil well from one class
 to the other and no permits shall be issued for that use, until a determination has been made by the
 Zoning Administrator or Area Planning Commission pursuant to the procedure prescribed in Subsection
 H of this section.

Key passages from ZA Memo 133, in effect since September 2016, are also included below. This memorandum requires public hearings on well conversion projects

West LA APC August 27, 2021 Page 15

and forbids reliance on a categorical exemption from CEQA when approving a well conversion.

From page 6 of ZA Memo 133:

An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All

Page 5 of ZA Memo 133:

- Ensure that the City complies with all legal requirements of CEQA in approving Section 13.01-H projects;
- Provide all parties that may be impacted by a project subject to a Section 13.01-H application an opportunity to participate in a public hearing;
- Meet the intent of CEQA in the review and approval of CEQA findings and determinations, to provide adequate public participation;
- English that shelf have there to entransately associates and engaged to if

Further, the ZA incorrectly claimed that well conversions are covered by Condition 72 of the 2000 ZA approval for the West Pico Drill Site. See page A10 of the ZA rebuttal to NASE's appeal:

ZA-1989-17683-PA2 A-10

As for any existing well, the operator is only required to produce copies of the re-drilling filings as such wells are already authorized by the City of Los Angeles and the State of California. So, converting any of the existing 59 wells from production to injection, or injection to production, only requires that the copies of the filings to CalGEM be sent to the Zoning Administrator's office.

The Zoning Administrator acknowledges the failure of the operator to send copies of the filings pertaining to the drilling activities. The operator was instructed to submit copies to the office of Zoning Administrator within 60 days.

Whether Condition 72 on redrilling is legal or illegal, it says nothing about well conversions, which are a different project from redrilling a well. Here is Condition 72, copied from the 2000 BZA decision which did not alter Condition 72 from the original version in the 2000 ZA approval (ZA-1989-17683-PAD). Note that neither the words "well conversion" nor any synonym appear in Condition 72:

72. <u>Limitations On Well Redrilling</u>. Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations. All wells will be drilled from existing well cellars using existing strings of pipe or surface conductor pipe. In the event that applicant redrills any of the existing wells, the applicant shall provide the Zoning Administrators office with duplicate copies of all filings pertaining to such well filed with the California Division of Oil, Gas and Geothermal Resources, including such filings showing the bottom-hole location and the total depth of each such well. Furthermore, the applicant, upon request by the Zoning Administrator, shall furnish such additional information concerning the status, exact bottom hole location, productivity, etc., of the various wells drilled from the property, as to enable the Zoning Administrator to properly and intelligently administer the oil drilling regulations in this area; said information to be either verbal or in writing and to be kept confidential by the Zoning Administrator if so desired by the applicant.

During the August 18, 2021 APC hearing, the ZA provided this misinformation about well conversions and new wells to the Commission only after the public testimony phase of the hearing was closed. We therefore could not respond to his fundamental misinformation about the new wells and well conversion projects. Thus, we write now to urge you to reconsider your determination based on an accurate recitation of critical facts and legal requirements.

Conclusion

The three examples of misinformation detailed above were far from the only such examples, but do represent the most egregious. The entire 5-review process was tainted by the ZA's decision to improperly narrow the focus of the review, thus failing to fulfil the requirements mandated by the Settlement Agreement and Condition 78, and thus continues the City's violations of those binding obligations.

The only proper solution is to overturn the ZA's decision in its entirety: the determination, findings, and fatally flawed statements of fact. If allowed to stand, the ZA's determination and findings will give *de facto* approval to by-right oil drilling without ZA approval. It will put the City in breach of the Settlement Agreement. It will put the City in continuing violation of CEQA and its own CEQA guidelines. And it will make an utter hash out of any ability to rely on the City's Zoning Administration process when it comes to oil cases at this drill site and at all the others.

West LA APC August 27, 2021 Page 17

We ask the Commission to please vote to reconsider its decision of August 18, 2021, to retain and extend jurisdiction over this case, to set it on the agenda for a meeting in the near future, and, most of all, for the Commissioners to take the time necessary to get down to the facts in a complicated case.

Sincerely,

Amy Minteer

Enclosures

James K. Williams, APC Executive Assistant (<u>james.k.williams@lacity.org</u>)

Attachment 1

SETTLEMENT AGREEMENT

This SETTLEMENT AGREEMENT (the "Agreement") is entered into effective as of the date of last execution shown opposite the signature blocks below (the "Effective Date"), between the CITY OF LOS ANGELES, a municipal corporation and local public agency, the CITY COUNCIL OF THE CITY OF LOS ANGELES, a local public agency, (collectively these two parties are sometimes referred to herein as "City"), NEIGHBORS FOR A SAFE ENVIRONMENT, a California nonprofit corporation ("NASE"), RAE DRAZIN, Ph.D., an individual, MINA SOLOMON, an individual, (NASE, Drazin and Solomon are sometimes collectively referred to as "Petitioners"), and BREITBURN ENERGY COMPANY LLC, a California limited liability company ("BreitBurn"). The purpose of this Agreement is to settle litigation relating to the approvals for the construction and operation of the West Pico Drillsite Modernization Project, Los Angeles County, California.

RECITALS

- A. In 1999, BreitBurn applied for a change in its Determination of Conditions and Methods of Operations for an existing drillsite located at 9101 West Pico Boulevard, Los Angeles, California (the "Project"). The Project calls for the modernization of the drillsite and the recovery of additional oil reserves and includes, among other things, the raising of the exterior wall, the enclosure of the drilling and workover rig in a soundproofed and architecturally treated structure, and the building of an enclosed support building. The Project also includes the removal of the existing diesel workover rig. The Project also removes prior limitations on permissible days and hours for redrilling and reworking of wells.
- B. The environmental assessment process began in 1998. A Draft EIR was completed and distributed for comments on April 15, 1999. The Final EIR was issued by the City in October of 1999.
- C. The Zoning Administrator held a public hearing on December 2, 1999 (ZA Case No. 17683-PAD). The Zoning Administrator issued her decision on April 5, 2000. That decision approved a modification of the existing conditions and methods of operation for the drillsite and imposed 78 conditions on the approval.

EXHIBIT A

1

- D. The Petitioners filed an appeal of the Zoning Administrator's decision to the Board of Zoning Appeals ("BZA"). A public hearing was held before the BZA on May 23, 2000 (BZA Case No. 2000-1697). The BZA approved certification of the EIR, the adoption of the Mitigation Monitoring Plan and adopted the environmental findings made by the Zoning Administrator. The BZA then denied the appeal and adopted the plan approval and conditions imposed by the Zoning Administrator, with corrections recommended by the Zoning Administrator ("Plan Approval"). The Plan Approval was not further appealable.
- E. The Petitioners appealed the BZA decision on the EIR certification to the City Council. A public hearing was held before the full City Council on October 25, 2000 (Council File No. 2000-1842). The City Council voted in favor of certifying the EIR and adopting the findings of the BZA as the findings of the City Council. The Notice of Determination of the certification was filed with the County Clerk the same day.
- F. The Petitioners filed a petition for writ of mandate in the Superior Court of Los Angeles County styled Neighbors For A Safe Environment, etc., et al. v. City of Los Angeles, et al., LASC No. BC 240760 (the "Action") seeking to set aside the certification of the EIR and the underlying permit approvals.
- G. On May 9, 2001, the Superior Court, Judge David P. Yaffe, presiding, entered a judgment ordering the clerk to issue a peremptory writ of mandate ordering the City to set aside its certification of the EIR and related approvals. The Statement of Decision of the Court indicates that the Court was concerned about the EIR's response to questions concerning nighttime noise.
- H. On May 16, 2001, the City mailed to interested persons an Addendum to the EIR addressing the issue of nighttime noise and informing them of further proceedings before the City Council on May 22, 2001. The Addendum concluded that noise from the facility at night will not alter any resident's ability to sleep. The Addendum and related City Staff report were circulated to approximately 800 owners and occupants of all properties surrounding the Project. The Petitioners filed objections to the report with the City.

- I. On June 1, 2001, BreitBurn and the City filed a Notice of Intention to Move for a New Trial.
- J. The parties have reached an agreement resolving all of the issues in the Action and wish to fully and finally terminate the Action pursuant to this Agreement. By entering into this Agreement, BreitBurn and the City have agreed to undertake additional measures relating both to nighttime noise, air quality and enforcement at the Project.

NOW, THEREFORE, in consideration of the mutual covenants and conditions contained herein, and for other good and valuable consideration, the adequacy and receipt of which is hereby acknowledged, the parties agree as follows:

AGREEMENT

1. Obtaining of air quality data

- a. On occasions to be prescribed by the Air Quality Consultant (defined in Item 1(d), below), the Air Quality Consultant will sample fugitive and other emissions inside the derrick structure. BreitBurn will, as far in advance as is practicable and at least 24 hours in advance, inform the Air Quality Consultant of the timing of those operations most likely to produce such emissions, including those periods when solvents are utilized. The Air Quality Consultant will take samples at representative times and will determine, in conjunction with BreitBurn, the relative percentages of time the facility undertakes various operations.
- b. The Air Quality Consultant will order that the samples be tested for such substances as shall be specified by the Risk Assessment Expert (defined in Item 2, below).
- c. The analysis of the emissions analyzed pursuant to this agreement will be performed by an independent laboratory certified by the State to perform such tests.

- d. NASE will designate a consultant (the "Air Quality Consultant") who shall be a certified industrial hygienist or an individual with a minimum of 5 years experience in air emissions sampling in the Los Angeles Basin.
- e. BreitBurn may request and thereupon will be given split samples obtained by the Air Quality Consultant under this section for the purpose of BreitBurn performing duplicate testing at its expense.
- f. On occasions to be determined by the Air Quality Consultant, and simultaneous with the obtaining of the samples within the BreitBurn facility, the Air Quality Consultant will obtain ambient air quality samples upwind and downwind from the BreitBurn facility. Those samples will be analyzed at the same laboratory for the same substances as were tested for within the BreitBurn facility.
- g. BreitBurn and NASE will deliver to each other, and to the Risk Assessment Expert (described in Item 2, below) a copy of the laboratory results of all testing performed under the provisions of this section, and of the reports of the Air Quality Consultant as to the manner of taking the samples and the rationale for such manner, and the determination concerning the various operations at the facility pursuant to subsection 1(a), in order that the risk assessment, described in the next section, accurately characterizes the emissions from the facility over time.

2. Development of Risk Assessment

- a. NASE will designate a toxicologist who shall be a Ph.D. level Diplomat of the American Board of Toxicology (the "Risk Assessment Expert").
- The Risk Assessment Expert will prepare and deliver to NASE, b. to BreitBurn, and to the Zoning Administrator a report (the "Risk Assessment Report") detailing the professional conclusions of the Risk Assessment Expert concerning the incremental risk to the nearest off-site human receptors of cancer and other indicated diseases posed by operations at the BreitBurn facility. The Risk Assessment Report will specifically address the population in close proximity to the site, e.g., children of school age. The Risk Assessment Report, including all modeling, will be conducted in a manner consistent with relevant and applicable guidance documents published by the United States Environmental Protection Agency and the California Environmental Protection Agency. The Risk Assessment Expert shall exclude from his or her analysis of incremental risk all chemicals and risks associated with ambient air at the site received from any sources other than the BreitBurn facility.

8. Noise

- a. In carrying out Conditions No. 77 and 78, and in addition to the other Conditions imposed, the Zoning Administrator will consider, based on data and reports, if any, submitted by BreitBurn, NASE or any neighbor, the extent to which the nighttime operations of the BreitBurn facility disturb the sleep of surrounding residents.
- b. In developing the noise requirements prescribed by the City, BreitBurn and its consultant shall consider, and the Zoning Administrator will review, the properties of sounds generated by the facility, in addition to decibels, that may contribute to the disturbance of the community at night and the data gathered pursuant to subsection 3(a).

- c. If the Zoning Administrator determines that nighttime noise from facility operations creates an unreasonable impact on nearby residents, the Zoning Administrator shall consider such additional mitigating measures as shall be required to eliminate any such impact. In the event that the Zoning Administrator determines that nighttime operations cannot be sufficiently mitigated by other means to eliminate unreasonable impacts, the Zoning Administrator shall order that workover or other operations not occur during the nighttime hours.
- Actions taken by the Zoning Administrator shall be subject to normal City procedures and appeals.

4. Enforcement

- a. If at any time the Risk Assessment Expert determines that the operations at the BreitBurn facility pose a risk of cancer of greater than one in a million (1 x 10-5), the Risk Assessment Consultant shall report that finding and recommendations to the Department of Building and Safety, the Zoning Administrator, the South Coast Air Quality Management District, and the Division of Oil and Gas.
- At the Review of Conditions required by Condition No. 78 Ъ. imposed by the BZA and adopted by the City Council, to occur two years after construction and the issuance of a Temporary or Permanent Certificate of Occupancy, the Zoning Administrator will consider the findings and conclusions of the Risk Assessment Expert and impose any additional conditions deemed appropriate or within the Zoning Administrator's continuing jurisdiction under Condition No. 77 or otherwise. If the report of the Risk Assessment Expert indicates that the operations at the BreitBurn facility pose a risk of cancer of greater than one in a hundred thousand (1 x 10-5), BreitBurn will request a public hearing and a public hearing will be deemed warranted pursuant to Condition No. 78. provision does not otherwise limit the Zoning Administrator's discretion to set the matter for public hearing.) Within ninety (90) days prior to the fifth anniversary of the first review held

pursuant to Condition No. 78, and on each five-year anniversary thereafter, BreitBurn will request an additional review of conditions pursuant to the procedures prescribed in Condition No. 78 and the Zoning Administrator will conduct a review of conditions as prescribed in Condition No. 78 and will issue a report of its review and schedule a further public hearing, if warranted. Such report shall be promptly forwarded to NASE, BreitBurn and the applicable Neighborhood Council.

c. For a period of two years following completion of construction, the City will designate one or more individuals at the managerial level of the Department of Building and Safety, who will receive complaints regarding odors or noise at the BreitBurn site on a 24-hour basis. The Department of Building and Safety will forward logs of such complaints to NASE and the Zoning Administrator's office. The Department of Building and Safety will report complaints within two (2) hours to the appropriate agency; e.g., the Police Department for noise; the South Coast AQMD for odors.

5. Financial Provisions

- a. BreitBurn will pay:
 - 1. \$65,000 to NASE for attorney's fees and costs in this matter;
 - \$25,000 to NASE to be used by it to engage technical advisors and perform testing not otherwise provided for in the Agreement and/or for other community projects;
 - Invoices from the laboratories utilized by NASE, the Air Quality Consultant, or the Risk Assessment Expert to analyze the air quality samples;
 - Invoices from NASE or the Air Quality Consultant described in Section 1 for the work described therein;

Invoices from the Risk Assessment Expert-or from any other costs associated with the risk assessment work described in Section 2 for the work described therein;

ó

- Any fees assessed by the City for the services described in Section 4(c);
- Any other reasonable and necessary costs of carrying out the provisions of the Agreement.
- exceed \$150,000. No expense of BreitBurn for split The maximum cumulative total that BreitBurn shall be required to pay for items 3 through 5 above, shall not with such activities. NASE shall contractually require samples, consultants to BreitBurn or any other voluntary expenditure of BreitBurn shall be included within said \$150,000. BreitBurn shall send statements to NASE periodically showing the sums expended in conjunction the Air Quality Consultant and the Risk Assessment Expert to perform their services in a manner prescribed y this Agreement, but BreitBurn shall promptly pay disagreement that BreitBurn may have concerning their findings and conclusions or their manner of performance. invoices irrespective of their duly presented œ

6. Resolution of Dispute

- a. Within three days of the approval of the Agreement by all parties thereto, each of the Petitioners, through a letter submitted to the City Clerk by their counsel, will withdraw their objections before the City to the Project and will support the making of any related actions of the City necessary to implement the Plan Approval and this Agreement.
- b. Following approval by the City of this Agreement, each of the Petitioners will stipulate to, and join in any motion or request made by BreitBurn to, set aside the judgment previously entered in this case and dismiss the action with prejudice and request that the Court enter a new judgment denying in its entirety the requested writ of mandate or in the alternative to enter an order unconditionally quashing the writ of mandate previously issued. That stipulation and/or joinder shall recite that the parties have reached a settlement in this case, and that costs and fees shall not be awarded to either party under the judgment to be entered. Should the judgment of the Court thereafter award costs or fees to either party, such party shall not seek to enforce that provision.
- c. If the Superior Court will not set aside the Judgment heretofore entered, and/or will not quash the writ of mandate heretofore entered and served, the Petitioners will join in supporting and will not thereafter object to the return to the Superior Court's writ of mandate to be filed by the City and describing its actions as in accordance with this Agreement as in satisfaction of the requirements of the writ.
- d. Neither party shall make any post-judgment motion nor seek to appeal the judgment entered, following resolution of this matter in accordance with this Agreement.
- e. Nothing in this Agreement shall constitute an admission by any party of any fact, nor shall it constitute a waiver of any right or objection of any petitioner to the facility or any of the operations thereof in the future, outside of the context of the Action.

f. It is the intention of the parties that the Project be allowed to proceed immediately in accordance with the prior conditions of approval as amended only by the terms of this Agreement. In the absence of the complete implementation of the resolution of dispute provisions of this Agreement, including the right of BreitBurn to proceed immediately to complete and operate the project without any further administrative or legal proceedings. it is the intent of BreitBurn and the City to file an appeal from the judgment entered by the Superior Court on May 9, 2001. A Notice of Entry of Judgment was served by Petitioners in this case on May 17, 2001. Pursuant to California Rules of Court section 2(a) provides that a notice of appeal must be filed no later than July 16, 2001. If the City does not take the actions set forth in subsection 6(b) or the Court has not accepted the actions of the City as in compliance with the writ or set aside the writ as provided in subsections 6(b) or (c), on or before July 16, 2001, then, unless otherwise agreed to by all parties, any party thereto may file a notice of appeal on such date and this Agreement shall terminate and be void.

7. Knowing Agreement

The parties each affirms that he/she/it has carefully read the foregoing and understands that this is a settlement agreement, and further affirms that each has reviewed and discussed the same with its counsel and knows the contents herein and has discussed the legal effect hereof and that the party executing the same does so of its own free act.

8. Entire Agreement

This Agreement embodies the entire understanding of and agreement between the parties as of the Effective Date and the parties each hereby agrees that the terms and provisions of this Agreement can only be changed, altered, or modified in any respect, by an instrument in writing and signed by all of the parties.

9. California Law

This Agreement shall be governed by, construed and enforced in accordance with the laws of the State of California and enforcement of this Agreement may be had in any court of appropriate jurisdiction in California.

10. Binding Effect and Benefit

This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

11. Authority of Signatories

All persons executing this Agreement on behalf of any entity hereby represent that they have proper authority to do so and to bind the entity to it.

12. Interpretation of Agreement

The parties have all participated in the drafting and preparation of this Agreement. Hence, in any construction to be made of this Agreement, the same shall not be construed against or in favor of any party on the basis that it or another proposed specific language.

18. Counterparts

This Agreement may be executed in two or more counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument. This Agreement will become effective only when executed by all parties.

BREITBURN ENERGY CO. 515 South Flower St, Suite 4800 LOS ANGELES CA 90071

Chris Williamson, Agent

Cypress, California March 13, 2006

Your proposal to rework(convert to injection) well "West Pico" 26, A.P.I. No. 037-20926, Section 30, T. 1S, R. 14W, S.B. B. & M., Beverly Hills Field, East area, Pliocene, Miocene pool, Los Angeles County, dated 3/8/2006, received 3/9/2006 has been examined in conjunction with records filed in this office.

THE PROPOSAL IS APPROVED PROVIDED:

- Blowout prevention equipment with hydraulic controls, equivalent to this Division's Class II2M requirements, or better, shall be installed and maintained in operating condition.
- Well killing fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used.
- 3. A pressure test is conducted to demonstrate the mechanical integrity of the 7" casing.
- 4. Within three months after injection is started, and every two years thereafter, this Division shall be furnished with sufficient data to confirm the confinement of the injected fluid to the intended zone of injection and to demonstrate the mechanical integrity of the 7" casing, injection tubing and packer.
- 5. Prior to any sustained injection above a gradient of .8 psi per foot of depth as measured at the sand face, injectivity and profile tests shall be made. The results of these tests and the proposed method of operations as to input rate, pressure and water distribution by subzones shall be submitted to this Division for approval.
- This Division shall be consulted and a Supplementary Notice may be required before making any changes in the proposed program.

7. THIS DIVISION SHALL BE NOTIFIED TO:

- a. Witness an inspection of the installed blowout prevention equipment prior to commencing downhole operations.
- b. Witness a pressure test of the 7" casing prior to injection.
- c. Witness the running of an injection survey.

NOTE:

- A crew drill may be required at the time of the blowout prevention equipment inspection.
- 2. This well shall conform to the provisions set forth in our letter dated 3/19/1985, revising the project.
- 3. The fresh water will be protected by the 7" casing cemented at 9740' with sufficient cement to reach to surface.
- 4. The water to be injected tests approximately 27,000 mg/l TDS and is water produced from neighboring wells.
- The water is to be injected into the Dunsmuir, Hauser, Ogden zone and contains a mixture of oil and water. The formation water tests approximately 23,000 mg/l TDS.

FML: Il That Tom Letiner / OM - Ole to IWC 9618'- 9175', instead co: Update EDP of Ble 9300't. Die to Withers Placing, lottion of ble 9300't. Die to Withers Placing, lottion of brelieve.

Date	<u>cn</u>
1/15/2006	Moved rig to WP 26. Rigged up, nippled up BOPE and secured well. NOTE: Top of fish at 8853' with 17' 2-7/8" NSL tubing at 9380'. Left in hold 45 deg. Collar + 527' 2-7/8" NSL tubing. Added perfs in 5" liner from 8454' – 8750', 8762' – 8820', and 8840' – 8882' on 5/9/2006.
1/16/2006	Bled well. Serviced EDM tower and lubricated rig. Pulled donut. POOH with 214 joints of 2-7/8" NSL tubing. Moved 32 stands of 207/8" IF dri pipe in derrick to driller side. Installed PGSR. Picked up and made up Central Fishing Tools 4" OD x 3-1/8" ID x 20/72' washover shoe. RIH on 2 7/8" P-105 work string to 6704'. Mixed 200 barrels of KCI fluid volume. Total 450 barrels in pits. Cleaned rig floor and picked up tools. Shut is and secured well.
1/17/2006	Bled well. Serviced EDM tower and lubricated rig. Worked with rig mechanic on air compressor. IRH with Central Fishing Tools washover shown combination 2-7/8" P-105 work string and 2-7/8" IF drill pipe. Made up 2-7/8" IF drill pipe working stand tagged at 8847". Conditioned and circulated KCI fluid, took 40 barrels to get circulation. Cleaned out from 8847" to 8853', washed over fish from 8853' to 8870' top of tubing collar Had ½ gallon can of fin sand in returns. Circulated well clean, pumped 2 hole volumes. POOH to 6704'. Shut in and secured well. Up wt. = 66kd down wt. = 35k, ROT. Wt. = 47k. Fluid loss = 122 barrels.
1/18/2006	Bled well. Serviced EDM tower and lubricated rig and grease rack. Lowered 4" OD x 3-1/8" ID Central Fishing Tools washover shoe to 8870' n new fill. POOH and laid down Central Fishing Tools washover shoe. Picked up and made up Central Fishing Tools 4-1/8" over shot dressed wit 2-7/8" grapple and 6 3-1/8" drill collars. RIH with Central Fishing Tools fishing tools on 2-7/8" P-105 work string tubing to 6696'. Shut in an secured well. Total fluid loss = 122 barrels.
1/19/2006	Bled well. Serviced EDM tower and lubricated rig. RIH with 4-1/8" over shot dressed with 2-7/8" grapple + B/S and jars + 6 3-1/8" drill collars intensifier from 6696" to 8852". Made up working stand. Circulated and worked over latch fish at 8853". Jarred 88K and pulled free at 130k POOH. Laid down 6 3-1/8" drill collars and Central Fishing Tools fishing tools and fish (recovered all of fish). RIH with 72 joints of 2-7/8" IF drippe, removed cross over and working stand. Repaired brake band on hydraulic tubing tongs. Laid down 72 joints of 2-7/8" IF drill pipe. RIH with 492' of 2-7/8" NSL tubing kill string. Shut in and secured well. Total fluid loss = 137 barrels.
1/20/2006	Bled well. Serviced EDM tower and lubricated rig. Unloaded 82 joints of 2-3/8" 8RD tubing. Held safety meeting with Weatherford Hydro tests and rig crew. Solid tested 2 joints of 2-3/8" 8RD rubbing. Made up hydro test tools. Picked up and TIH with 45 deg. Collar + 80 joints of 2-3/8 8RD tubing testing to 5000 psi. Changed out hydro test tools from 2-3/8" to 2-7/8". TIH with 2-7/8" NSL tubing hydro testing to 5000 psi. Hydro test tool not working, trouble shoot and changed all cups. Continued to TIH with combination 2-3/8" 8RD and 2-7/8" NSL tubing to 6616". Hydrotested to 5000 psi. Shut in and secured well.
1/21/2006	Bled well. Serviced EDM tower and lubricated rig, Pulled 25 hydro tested stands of 2-7/8" NSL tubing and stood back on off driller side Continued to TIH with 2-7/8" NSL tubing to 9450", no fill. Hydro tested all 2-3/8" 8RD and 2-7/8" NSL tubing to 5000 psi. Rigged dow Weatherford hydro tester. POOH above perfs to 6700". Re-arranged support bay to lay down 2-7/8" NSL and 2-3/8" 8RD tubing. POOH to 2824 Laid down 123 joints of 2-7/8" NSL tubing. Shut in and secured well.
1/22/2006	Bled well. Serviced EDM tower and lubricated rig. Laid down 2-7/8" NSL tubing. Loaded out 82 joints of 2-7/8" drill pipe, 15 joints of 2-7/8" NSL tubing, 6 3-1/8" drill collars and wash pipe. RIH with 2-7/8" tubing. Laid down 2-7/8" NSL tubing (265 joints). RIH and laid down 2-3/8" tubing (8 joints). RIH with kill string to 516' and secured well.
1/23/2006	Loaded tubing from support bay onto truck. Serviced rig and grease rack. Cleaned rig floor and support bay. Loaded tubing from support ba onto truck. Continued cleaning. Unladed tubing (243 joints of 2-7/8" N-80 8RD, 81 joints 2-3/8" N-80 8RD). POOH with kill string. Made up 7 scraper with bumper sub. RIH picking up tubing (45 joints). Secured well.
1/24/2006	Serviced rig and EDM tower, mixed KCl. Picked up 2-7/8" tubing and RIH with 7" casing scraper (removed thread protectors). Strapped tubing rabbited tubing. Rigged up to reverse circulate. Reverse circulated well clean at liner top (7101'). POOH with tubing to 2708', secured well.
11/25/2006	Serviced rig and EDM tower. POOH and laid down 7" scraper. Rigged up 2-3/8" tools. Made up 5" scraper, tally and picked up 2-3/8" tubing an RIH. RIH with 2-7/8" tubing. Scraper stopped at 8868'. Attempted to work through tight spot – would not go. Reverse circulated, full returns, n solids. POOH to 6889' and secured well.
11/26/2006	Serviced rig and EDM tower. POOH with tubing. Held safety meeting with tubing tester. Solid tested 7 joints of tubing. Rigged up tester Repaired test tools. RiH testing in. Waited on extra tubing delivery. Cleaned rig. Finished testing 2-3/8" tubing. Changed over to run 2-7/8 tubing. Rigged down 2-3/8" test tools, rigged up 2-7/8" test tools. Secured well at 2793".

Pumped cement plug from 9618' OOH to 6874'. Reverse circulated o) inspected and witnessed BOPE tubing and tagged cement plug at 9123'. POOH and laid down 50 id secured well. Cleaned rig and
DOH to 8874'. Reverse circulated inspected and witnessed BOPE tubing and tagged cement plug at 9123'. POOH and laid down 50
9123'. POOH and laid down 50

1

3/24/2007	Held safety meeting and serviced EMT tower and equipment. Test ran pump and top drive. Rigged up to reverse circulate. Worked with electrician to wire up centerfuge and desander. Picked up 6-1/8" bit. Measured and picked up 4 4-3/4" drill collars. RIH with 2-7/8" hydrill tubing. Tagged cement at 6419". Rigged up pump. Hole standing full. Drilled out 3' cement bridge to 6422'. Continue to RIH. Tagged cement at 6747'. Drilled on cement from 6747' to 6809'. Circulated hole clean.
3/25/2007	Held safety meeting and serviced EMT tower and equipment. Drilled on cement from 6809' to 6861'. Drilled on retainer from 6861' to 6864'.
3/26/2007	Held safety meeting and serviced EMT tower and equipment. Drilled on retainer and cement to 6867'. Circulated hole clean. POOH and secured well.
3/27/2007	Held safety meeting and serviced EMT tower and equipment. Rigged down PGSR. POOH. Picked up new 6-1/8" bit. RIH to 6887'. Drilled on retainer and cement.
3/28/2007	Held safety meeting and serviced EMT tower and equipment. Drilled on retainer and good cement to 7095', 5' from top of liner. Circulated hole clean. Tested casing to 500 psi for 10 minutes (OK). POOH and secured well.
3/29/2007	Held safety meeting and serviced EMT tower and equipment. POOH with tubing and laid down 4 4-3/4" drill collars and 6-1/8" bit. Changed head and liner in #1 pump. Picked up and made up 4-1/8" bit and 6 3-1/8" drill collars. Rigged up to run 2-3/8" tubing. Picked up and RIH with 63 joints of 2-3/8" tubing. Secured well.
3/30/2007	Held safety meeting and serviced EMT tower and equipment. Rigged up to run 2-7/8" rubbing. RIH to 7095'. Flushed surface lines. Drilled out cement from 7095' to 7229'. Circulated hole clean and POOH above liner to 7020' and secured well.
3/31/2007	Held safety meeting and serviced EMT tower and equipment. RIH and continued drilling out from 7229' to 7556', circulated hole clean. Pulled out of liner to 7020', secured well.
4/3/2007	Held safety meeting and serviced EMT tower and equipment. Change dliner and head in pump #1. RIH and drilled out cement from 7556' to 7763'. Flushed rocks and debris from pump #1, circulated hole clean. Drilled out cement from 7763' to 7794'. Circulated hole clean and POOH to liner top at 7020', secured well.
4/4/2007	Held safety meeting and serviced EMT tower and equipment. POOH with tubing and 3-1/8" drill collars. Changed 4-1/8" bit. Made up new bit. RIH with drill collars and tubing. Broke circulation and continued drilling out cement from 7794' to 7834'. POOH above liner top to 7020'. Secured well.
4/5/2007	Held safety meeting and serviced EMT tower and equipment. RIH to 7825' and circulated. Drilled on hard cement from 7834' to 8300'. Total for day was 466'. Circulated hole clean. POOH to top of liner at 7101'. Secured well.
4/6/2007	Held safety meeting and serviced EMT tower and equipment and grease rack. Rigged up new 2-7/8" elevators. RIH to 8258' and circulated. Drilled on hard cement from 8300' to 8645', Total for day was 346'. Circulated hole clean. POOH to top of liner at 7101'. Secured well.
4/7/2007	Held safety meeting and serviced EMT tower and equipment. RIH to 8630' and circulated. Drilled on hard cement form 8645' to 8900'. Drilled on rubber at 8889'. Dropped free at 8900' to 9000'. Circulated hole clean. POOH to 8754'. Secured well. Transferred fluid from pits to west storage tank. Cleaned pits. Filled pit with lease water and mixed 60 sacks of KCI.
4/8/2007	Held safety meeting and serviced EMT tower and equipment. RIH to 9000'. Changed hole over with 320 barrels of 3% KCI water from 9000'. POOH. Laid down 6 3-1/8" drill collars. Cleaned rig floor. Measured and picked up 5" casing scraper and bumper sub. RIH to top of liner at 7068'.
4/9/2007	Held safety meeting and serviced EMT tower and equipment. Continued to RIH with 5" casing scraper to 8000". POOH an odd break. Laid down 1 bad joint. Stood back 14 joints of 2-3/8" tubing. Laid down 35 joints of 2-3/8" tubing in support bay. Organized tubing and rods in support bay. Picked up 5" Weatherford mechanical packer. RIH with 28 joints of 2-3/8" N-80 8RD EU tubing. 2-3/8" x-over. Picked up 180 joints of 2-7/8" N-80 8RD EU tubing. EOT at 6420". Secured well. NOTE: Chris McCullough with DOG approved variation from permit to run cement retainer. to 9175" at 12:20pm.
4/10/2007	Held safety meeting and serviced EMT tower and equipment. Continued to pick up 2-7/8" N-80 8RD Eu tubing. Total 227 joints. Picked up tubing hanger and landing joint and swivel. Set Weatherford Arrowset 1-X mechanical packer at 7895' with 15k compression. Attempted to pressure casing (back side of packer) test no good. Tubing hanger leaked. Nippled down BOPE. Picked up landing joint and pulled up tubing hanger. Replaced O-rings. Landed hanger. Nippled up production tree. Pressure up backside pf packer to 500 psi for 15 minutes, tested OK. DOG waived witness of pressure test. Prepared to move rig to west side. Moved skid beams to east side.
4/12/2007	Held safety meeting and serviced EMT tower and equipment. Rigged up Tiger wireline to perforate. Held safety meeting. RIH with 1st gun run through tubing – gun stopped at 7085'. POOH with wireline and rigged down. Change of orders – move to PW 9. Moved and installed extension beams for rig move. Rigged up hose and pump to neutralize storage tank.
4/28/2007	Rigged up Baker chemical truck to pump scale squeeze. Worked on safe air fans on rig. Rigged down rig extension beams. Moved rig to WP 9 and rigged up. Laid down V-door extension. Cleaned location. Nippled down production tree and nippled up BOPE and function tested. Secured well.
4/29/2007	Held safety meeting with crew and serviced rig. Released 5" packer and POOH. Cleaned rig and location, replaced antifall sala blocks safety devices and secured well.
4/30/2007	Held safety meeting with crew and serviced rig. Waited on packer delivery. Made up packer and RIH with 2-3/8" tubing, drifting. Changed out 1 joint. Rigged up 2-7/8" tubing equipment and RIH with 2-7/8" tubing, drifting, changed 3 joints. Attempted to set packer at 7896', pulled to 7865' and attempted to set packer. Rigged up to reverse circulate and reversed 50 barrels of lease water. Attempted to set packer, rigged up to circulate ahead. Circulated down tubing, attempted to set packer – packer set at 7833' in neutral. Secured well.
5/1/2007	Held safety meeting with crew and serviced rig. Nippled down BOPE. Nippled up production tree, rigged up and tested packer for 10 minutes at 500#. Continued to work on safe air fan on top drive. Prepared location and lugged down and moved rig. Released rig at 1200 hours.
5/5/2007	Perforated with 1-9/16" OD RTG guns, 1 spf 0 degree phasing with Jet Research Center Millennium Charges. 0.21" entry hole and 11.34" penetration. Perforated from: 8841' <8882', 8762' - 8819', 8455' - 8749', 8357' - 8406', 8276' - 8319', 8048' - 8250'.

Your proposal to rework (convert to injection) well "SW" 7, A.P.I. No. 037-21181, Section 30, T. 01S, R. 14W, SB B. & M., (Lat: 34.055475 Long: -118.390221 Datum: NAD83), Beverly Hills field, East area, Miocene pool, Los Angeles County, dated 1/12/2017, received 2/10/2017 has been examined in conjunction with records filed in this office.

THE PROPOSAL IS APPROVED PROVIDED:

- Blowout Prevention Equipment (BOPE), as defined by this Division's publication No. M07, shall be installed and maintained in operating condition and meet the following minimum requirements:
 - a. Class II3M, with hydraulic controls, on the 8 5/8" casing. All casing annuli control valves must meet, or exceed, the same minimum pressure rating as the blowout prevention equipment. The pipe safety valve must be suitable for all pipe in use, including casing
 - b. A 3M lubricator for wireline operations.
- The well is designated a CRITICAL WELL and as such, the Notice to Operators, dated May 21, 2001, specifying additional BOPE requirements for critical wells, shall be in effect (attached).
- Hole fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used.
- 4. This well shall conform to the provisions set forth in our letter dated December 7, 2016, approving the project.
- Injection is through tubing with packer set in cemented casing immediately above the approved zone of injection.
- Prior to commencing injection, and every 5 years thereafter, a Standard Annular Pressure Test (SAPT) is conducted to demonstrate the mechanical integrity of the 8 5/8" casing. The minimum test pressure shall be the Maximum Allowable Surface Pressure (MASP).
- 7. Within 90 days of commencing injection, and every 2 years thereafter, this Division shall be furnished with an injection survey that demonstrates the confinement of the injected fluid to the approved zone of injection, and the mechanical integrity of the injection tubing and packer.

A copy of this permit and the proposal must be posted at the well site prior to commencing operations. Records for work done under this permit are due within 60 days after the work has been completed or the operations have been suspended. Issuance of this permit does not affect the Operator's responsibility to comply with other applicable state, federal, and local laws, regulations, and ordinances.

Page 2 Well #: "SW" 7 API #: 037-21181 Permit : P 117-0046 Date: February 22, 2017

- 8. The injection gradient will be 0.6 psi/ft. This injection gradient shall not be exceeded. A higher injection gradient may be approved by this Division subject to a step rate test conducted for this well.

 If the results of the SRT is significantly higher than the project injection gradient of **0.6 psi/ft**., a new SAPT may
- 10. No program changes are made without prior Division approval.11. THIS DIVISION SHALL BE NOTIFIED TO:
- - a. Inspect the installed BOPE prior to commencing downhole operations.
 b. Witness an SAPT of the 8 5/8" casing prior to commencing injection, and every 5 years thereafter.
 - c. Witness the running of an injection survey within 90 days of commencing injection, and every 2 years thereafter.

NOTE:

- 1. All depths are based on well KB, which is 13.5' above ground level. Ground level is at elevation 171'
- The base of the freshwater zone is at 550'±.
- The base of the USDW zone is at 845'±.
- The top of the Repetto zone (TIZ) is at 5500'±.
- The top of the Hauser zone is at 6480'±.
- No operation shall be undertaken or continued that will contaminate or otherwise damage the environment.
- 7. Upon completion of the proposed work, a History of Oil or Gas Well (form OG103) shall be submitted to this office, noting the effective date of reactivation.

8/02/2017	Power up rig. Move v-door into place. Move accumulator into place. Clean up location. Traveled back to yard. EOT . NOTE: Pat Vigeant lease Forman contacted DOGGR @ 1:48 PM and spoke to Renee and scheduled a BOPE inspection for 2:00 PM on 8/3/17.
8/03/2017	Bled down well. N/u xo spool, riser and BOPE. Hooked up kill line. Eric Weigand from cypress DOGGR office arrived @ 2:00 PM for BOPE inspection. BOPE inspection was passed and paper work is singed and in place. Continued to unscrew donut studs. Unland donut. POOH with tbg detail. Closed BOPE. Secured well and rig till AM. Started to prepare and lay out new 2 7/8 tbg detail in support bay.
8/04/2017	Laid out new 2.7/8 tbg in support bay to measure. Unload scrapers and bumper sub. Took picture and measured 8.5/8 all weight scraper and bumper sub. M/u scraper and bumper sub. Started picking up 2.7/8 tbg detail. RIH with 8.5/8 scraper. Tagged a few spots of scale build up @ 1297' & 1638'. Worked scraper up and down through the rough spots. Pick up and ran in 134 jnts of 2.7/8 tbg. Closed BOPE and tbg valve. Secured well and rig till AM. Hooked backside up to VR.
8/07/2017	Bled well down. Continued to P/u and RIH with tog detail. Tagged spot @ 5934', Worked 8 5/8 scraper through. Continued to RIH with work string to tag 6 5/8 liner top @ 6777'. POOH with tog detail. P/u and M/u 8 5/8 tension packer. R/u Hydro tester. Started to RIH testing tog to 5000 psi. Closed BOPE and tog valve. Secured well and rig till AM. Hooked backside up to VR.
8/08/2017	Bled well down and opened up BOPE. Continued to RIH with £ 5/8 packer and hydro testing tbg, RIH to 1505' to test packer. Set packer in tension. (40,000 over string weight) Unable to fill casing. Released packer and POOH to 733'. Set packer in tension. Unable to fill casing. Released packer and POOH to check packer. Packer looks good. RIH to 66' and set packer. Unable to fill casing. POOH and removed the unloader valve. RIH and set packer @ 58'. Unable to fill casing. Noticed slight blow up tbg. Released packer. POOH to 8' and set packer. Filled casing. Scheduled Tiger wire line for casing caliper log. Released packer, POOH and laid down packer, Closed BOPE. Secured well and rig till AM.
8/09/2017	Bled down well and opened up BOPE. Swapped out accumulator's. R/d hydro tester's tools. Spotted Tiger wire line truck, R/u pole and wire line sheaves. RiH with caliper tool. Logged casing from top of liner @ 6765' to surface. Consulted with engineer and lease Forman. Turned logs into lease Forman. Closed BOPE. Secured well and rig till AM.

Bled down well, Laid down landing jnt. N/u production tree with new valves. Helped plum in injections lines for injection. Turned well

8/30/2017

over to injection. Powered down rig.
